

Institute of Contemporary Art Student Experience

“Working closely with Robert Chaney, the director of curatorial affairs at the ICA, I was exposed to a various aspects of exhibition planning process along with the curatorial and the larger ICA team. Over the course of my internship, I participated in meetings, organized and digitized a wide range of archive materials, and researched on various topics from digital archive to accessibility. Through my internship, I was able to learn how an art institute like the ICA operate within its team, with other collaborators, and with other artists.”
